

A NEW WAY TO MAKE CHANGES IN YOUR BANK OR OTHER PUBLIC SERVICE ACCOUNT

WHAT WE CREATED

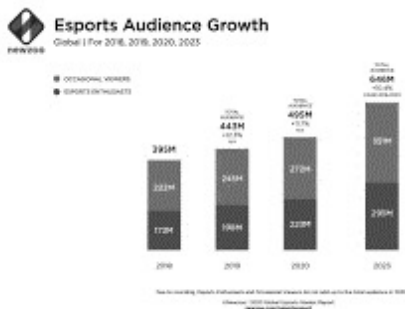

We created an innovative digital banking and public services experience. OC **increased security** by improving the traditional verification system, and allowed users **greater freedom** to easily edit their personal information. By combining existing technology with high-level strategy, accounts can be securely updated and verified.

INDUSTRY

In the financial sector, innovation and technology are limited for employee training purposes. For almost 200 years, transactions have had the same face with a different mask every decade.

The new 4.0 industry is here to take us into an era of technology and possibilities. Cryptocurrencies are growing rapidly and regulating the global economy.

We believe high-tech, artificial intelligence services has the potential to change our daily lives. These tools can improve our day-to-day transactions and partnerships with banking and public services.

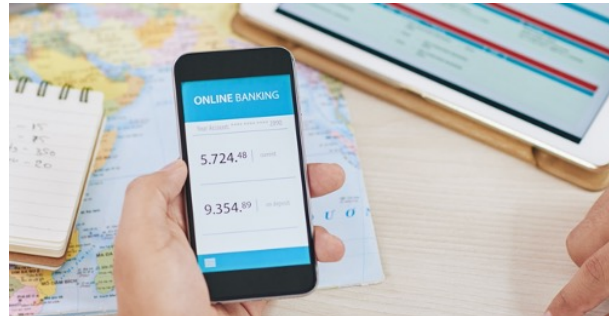

5AXIS ACT is a protocol that connects through any service (public services, bank). It retrieves important customer information to guide a new high-tech experience.

Platform users can link their personal information to public services and bank accounts.

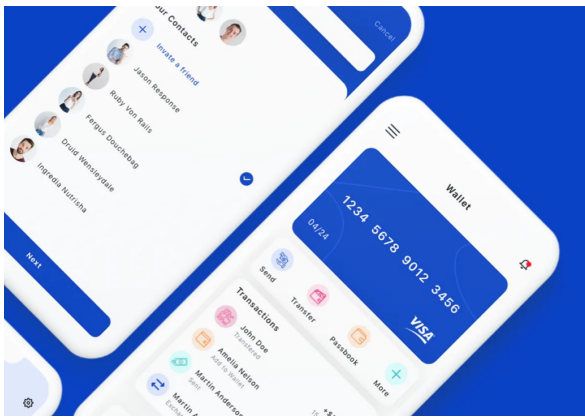

We aimed to make daily transactions easier in the following areas:

- Change of personal information
- Information on marital status
- Recovery of old conditions
- Tax clearance
- Connection with personal email, phone and various accounts
- Digital ID, a passport based on a unique QR-code

OC's purpose is to provide users with:

- direct access to important documents,
- personal information,
- the ability to change their data at any time using a mobile phone,
- and to travel simply with a mobile phone.

WE AT ORANGE-CIRCLE

At ORANGE-CIRCLE, our innovation team combines AI and daily technology to enhance user transactions. Our idea can apply across industries – including banking, public services, tax offices, and more.

CREATIVE

Creativity and innovation go hand in hand to provide:
