OC INNOVATION CONSULTANCY

## 5AXIS: Revolutionizing Digital Banking and Public Services

5AXIS introduces a secure, high-tech protocol for seamless personal data management and transactions across banking and public services

A new way to securely update and manage your personal information with ease.
Problem Statement

- Outdated systems for updating personal and financial information
- Lack of security in traditional verification processes
- Inefficient connections between banking and public services
- Limited user access to important documents and data
- Complexity in managing accounts across different platforms

02
Ideation

Brainstormed 10 concepts to improve user transactions

01
Research

Analyzed existing gaps in banking and public service data management

04
Prototyping

Developed and tested mobile-based document and data update tools

03
Concept Development

Designed a secure protocol integrating AI and QR-based Digital ID

05
Implementation

Launched a system for seamless, secure interactions across industries

Esports Audience Growth
Global | For 2018, 2019, 2020, 2023

Results & Outcomes

- Designed 5AXIS, a protocol for secure data management
- Enhanced security with AI-driven verification system
- Integrated a unique QR-code Digital ID for personal transactions
- Connected banking and public services for seamless updates
- Simplified access to critical documents and information via mobile devices
